Valet Property Solutions

Business Plan

All in 1 Realty LLC

DBA "Valet Property Solutions"

Prepared March 2026

info@valetpropertysolutions.com

Executive Summary

Valet Property Solutions (VPS) provides doorstep valet trash pickup for apartment communities. Our valets collect trash from outside each resident's door 5–7 nights per week and haul it to the on-site dumpster — a hands-off, premium amenity that residents love and property managers profit from.

Valet trash is the **#1 rated resident amenity** in multifamily housing nationally, yet no established local provider currently serves the Wichita market. National companies focus on larger metros and charge higher rates. VPS fills that gap as a locally owned, competitively priced alternative with the technology, branding, and operational plan ready to launch.

We are seeking $5,000 in startup funding to purchase equipment and launch marketing. The business generates revenue from Month 1 of service, and we project **full repayment within 90–120 days** of landing our first property contract.

How the Business Works

The model is simple and the math is straightforward.

VPS CHARGES PROPERTY	PROPERTY CHARGES RESIDENT	PROPERTY MANAGER PROFIT
$35	$50	$15
per unit / month	per unit / month	per unit / month — pure margin

This is why properties say yes: we hand them a new revenue stream they didn't have before. No out-of-pocket cost to the property manager — the resident fee covers VPS's charge and generates net profit from day one.

What VPS Provides

- **Doorstep trash pickup** 5–7 nights/week on a set schedule
- **Collection bin** placed outside each unit door (included in service)
- **Background-checked, uniformed valets** — residents know who's in their hallway
- **Nightly route completion reports** via our custom management app
- **General liability insurance** with COI naming property as additional insured

- **One local point of contact** — not a national call center

The Market

Wichita Multifamily Market

- **Metro population:** ~650,000
- **Apartment units:** 30,000–40,000+
- **New construction:** ~800 units added in 2024
- **Average occupancy:** 92%+

Why Now

No established local valet trash provider serves Wichita. National players (Valet Living, Trash Butler) focus on major metros and charge premium rates. The 75–300 unit mid-market properties that make up most of Wichita's inventory are underserved and ready for a local alternative.

Target Properties

Apartment communities with 75–300+ units in the Wichita metro area — Wichita, Derby, Andover, Maize, and Haysville.

Class B and C properties are our sweet spot. These managers feel the most pressure to add revenue without raising base rent. The NOI pitch lands hardest here.

Competitive Advantage

Property managers currently have two options: let residents self-manage trash (leading to overflows and complaints), or pay a national provider who doesn't prioritize their market.

VPS is the **local alternative** — owner-operated, competitively priced, accountable, and backed by purpose-built technology.

The NOI Case — Why Property Managers Sign Up

200-UNIT PROPERTY EXAMPLE

Resident fee collected ($50 × 200 units)	$10,000 /mo
VPS service cost ($35 × 200 units)	−$7,000 /mo
Property manager net gain	**+$3,000 /mo**
Annual NOI increase	$36,000
Estimated property value increase (6% cap rate)	**+$600,000**

We are handing property managers **$36,000/year in new NOI** and a **$600,000 bump in asset value** — and it costs them nothing out of pocket. This is the pitch that gets contracts signed.

What We've Already Built

We aren't starting from zero. Before seeking any funding, we've invested significant time building the operational foundation:

- **Legal entity established** — All in 1 Realty LLC is active and registered
- **Professional website live** — Full-featured site with contact form, interactive NOI calculator, service details, and complete branding
- **Custom management app built and tested** — Android app for route management, employee tracking, nightly PDF reports (auto-generated), admin-to-valet messaging, unit-level issue logging with photo documentation
- **Brand identity complete** — Logo, color system, pitch materials designed and print-ready
- **Market research complete** — Pricing validated against national competitors, target properties identified
- **Service agreement template ready** — Contract template prepared for property manager review

> **This isn't an idea on a napkin.** The operational infrastructure is built and ready to deploy. We need equipment to start serving properties.

The Ask: $5,000

We need $5,000 to purchase equipment and launch marketing. Here's exactly where every dollar goes:

Equipment	$2,400
1,000 collection bins @ $1.50	$1,500
100 extra bins (buffer)	$150
Utility carts (2–3)	$350
Gloves, bags, supplies	$200
Branded bin stickers	$200

Branding & Marketing	$1,400
Uniform shirts (6–8)	$200
Business cards	$40
Printed pitch sheets	$75
Vehicle magnets	$125
Google Ads (3 months)	$450
Social media ads (3 months)	$350
Door hangers / flyers	$125

Business Essentials	$1,000
Liability insurance (annual)	$750
Bonding	$150
DBA registration	$30
Domain name	$15
Contingency	$55

Total: $4,800 (~$200 contingency buffer)

Repayment: $5,000 in full — no equity, no interest. Projected payback: **90–120 days** from first contract.

One 150-unit property at $35/unit generates **$5,250/month** in gross revenue. After labor and operating costs (~50%), net cash flow is ~$2,600/month. The loan is repaid within 2 months of steady service. Even conservatively — a smaller 100-unit first contract ($3,500/month gross) — repayment happens within 3 months.

Revenue Projections

Year 1 — Conservative Ramp

TIMELINE	PROPERTIES	UNITS	MONTHLY GROSS REVENUE
Months 1–2	0	0	$0 (sales/onboarding)
Month 3	1	100	$3,500
Months 4–5	2	250	$8,750
Months 6–8	3	400	$14,000
Months 9–12	4–5	600	$21,000
Year 1 Estimated Gross Revenue			**$100,000 – $140,000**

Year 1 estimated net income (after labor, supplies, insurance): $40,000 – $60,000

Year 2 — Growth Phase

- 8–12 properties, 1,200–1,800 units
- $42K–$63K/month gross revenue
- Hired route employees (labor ~50%)
- **Projected net: $150K–$250K annually**

Year 3 — Established Operation

- 15–25 properties, 2,500–4,000 units
- Multiple route teams with ops manager
- **Projected annual gross: $1M–$1.7M**
- Expansion to surrounding Kansas markets

Operations

Nightly Routes

Residents place trash in bins outside their doors by 9 PM. Valets walk every hallway between 8 PM–midnight, collecting and hauling to the community dumpster. Each valet handles 100–150 units per shift (~2 hours). Route completion is logged in the VPS app with unit-level tracking.

Scaling

Owner-operated through 200–300 units (1–2 properties). First hire at 300+ units — part-time evening positions, $13–16/hour. Each additional employee adds ~150 units of capacity.

Quality Control

Nightly digital route reports auto-generated and shareable with property managers. Unit-level issue logging with photo documentation. Direct messaging between admin and valets through the app. Same-day response on property manager concerns.

Risk Mitigation

Slow acquisition	Direct outreach + real estate network
Valet no-show	Owner as backup; proactive PM comms

Contract cancellation	30-day clause; diversify quickly
National competitor	Local relationship + lower overhead
Bin damage/theft	$1.50/bin — 10% annual replacement

Team

Shannon Honse

Owner / Operator

All in 1 Realty LLC. Real estate background with local property management relationships. Hands-on operator who will run initial routes personally before hiring.

Dustin Wohlgemuth

Operations & Technology

Built the VPS management app and website. Handles route overflow, technology infrastructure, and operational scaling support.

Bottom Line

Valet Property Solutions is a simple, proven business model entering an underserved local market with a complete operational foundation already built. We're not asking for money to figure out if this works — valet trash is a **$2B+ national industry**. We're asking for $5,000 to buy equipment and start serving properties.

The money buys bins, branding, and insurance. Revenue starts with the first contract. **Payback happens within 90–120 days.**

The infrastructure is built. The market is open. We just need to stock the truck and start knocking on doors.
